### **DETAILED ACTION**

This office action is in response to the amendment received on September 8, 2003. In accordance with the amendment, claims 4-5, and 8-9 have been amended. Claims 1-3 have been canceled.

#### ***Allowable Subject Matter***

1. Claims 4-9 are allowed over the relevant prior art. The following is an examiner's statement of reasons for allowance: the relevant prior art does not teach or reasonably suggest an infrared data communication apparatus (or method of making, claims 4, 8) having a die bonding pad with a circular shape, in which the gold plating layer is exposed for reflecting light emitted from the light emitting element. The relevant prior art does not teach or reasonably suggest an infrared data communication apparatus (or method of making, claims 5, 9) in which a molded resin body protects and covers three components (emitter, IC, receiver) in which this molded resin body has enhanced bonding to the substrate based on a recess existing in the substrate in which the recess is completely filled with part of the molded body alone. The closest prior art of record (Cited Prior Art by Applicant, Sakamoto et al. U.S.P. No. 6,548,328) does not teach or reasonably suggest these further features, based on the amendment received on September 8, 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

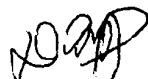

Art Unit: 2874

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, with respect to the state of the art of transmitter/receiver systems: new PTO-892 form references A-C.
